Learn to apply leadership & change management principles to align and motivate own staff and partners’ staff to realise goals.

Learn:

- how a results-oriented work environment can be created
- how to better manage external stakeholders and their expectations
- how to analyse & resolve conflicts through a systematic approach
- how to forge and lead cross functional teams
- how to strengthen subject organisations, empowering individuals and promoting accountability and ownership principles
- how to promote self-steering teams and autonomous work culture
